Description

- TM 135-4C with 18 station Carree
- Special fixtures for printing on leather are mounted on the pallets
- Fixtures automatically open and close using a pneumatic cylinder to change leather
- Fixtures can be changed for different applications on leather
- 3 laser pointers are a guide for the operator to position the leather in the correct position

Operation:

- electro-pneumatic drive
- Fully programable controls.
- Pad printers are fully programmable for single, multiple hits, pad delay, etc.
- The printing cycle is individually adjustable by flow control valves
- The machines are certified to EU legislation 89/392/EWG and have the CE label.
