

Clichee dryer KT 520

Improvement of lifetime

- even and constant harden, important especially for multi colour printing
- improvement of lifetime
- clichees much better slide colours

Clichee dryer KT 520

With this cliché dryer KT 520 from Media Service Grulms your cliché will be dried and at the same time hardened thus lifetime improves.

This cliché dryer KT 520 is suitable for both water and alcohol based clichés.

This large dryer with an effective area of max. 250 x 520 mm allows you to work efficient and flexible.

At a working temperature of approx. 90 °C you reach an even and constant hardening process. The surface is perfect prepared for a longterm application even for multi colour printing.

In particular at closed systems ink cups will better slide.

That cliché dryer can be arranged space saving under the exposure unit of Media Service Grulms.

Our recommendation is to put the following combination:

exposure unit

cliché dryer

cliché cleaner
